TOP 5 THINGS
You Should Know About

zenoss + NUTANIX

ONE

Zenoss is the Only Enterprise Monitoring Solution Certified Nutanix Ready - Integrated

Zenoss collaborated with Nutanix to create the Nutanix ZenPack, a prebuilt, jointly tested and validated custom extension to the Zenoss platform that enables Zenoss to provide advanced monitoring for Nutanix hyperconverged infrastructures (HCI) deployed anywhere.

TWO

Nutanix is a Zenoss Customer

Nutanix IT uses Zenoss to monitor their IT environments to ensure the highest levels of performance and availability for applications and services that power their business. Nutanix uses Zenoss to monitor HCI and other critical systems across Nutanix environments.

THREE

You Can Turbocharge Nutanix Prism With Zenoss

Prism provides insights specific for managing Nutanix clusters. Zenoss enhances this management by linking business services to underlying resources by building a real-time model of each IT service. Zenoss provides the most granular view into Nutanix clusters and augments Prism by providing historical data analytics.

FOUR

Zenoss Monitors Nutanix and All Other Cloud and On-Premises Resources

Zenoss extends HCI monitoring capabilities to all cloud and on-premises IT resources in a single unified view. Zenoss also enables customers to identify all systems/workloads throughout their IT environments and determine what can be moved to Nutanix or the cloud for optimization and cost reduction.

FIVE

Zenoss and Nutanix Enable Digital Transformation

Zenoss and Nutanix have a common objective to increase IT agility and eliminate the risk associated with modern, dynamic environments. Like Nutanix, Zenoss enables customers to escape the limitations of traditional IT infrastructures, providing seamless deployments that scale elastically.

NUTANIX™
READY
• INTEGRATED •

Visit our website today at **www.zenoss.com** to contact to schedule a consultation and live demo of the Zenoss-Nutanix integration.
